

Dr. MacRae Interviewed by Jim Neher 8-6-79

On or two things occur to me in relation to some things we were speaking of last time. I did not want to give the impression when I utterly minimized the idea of a long continuing conspiracy or a conspiracy of a particular racial or religious group. ~~xxxxxx~~ ~~xxxxxx~~ that I don't think the communist conspiracy today is a very real thing. I believe the Russian government is pouring great sums of money into attempts to overthrow our whole situation in this country, and they are doing everything they can to cause confusion and turmoil, but I don't think that with all their cleverness and skillfulness, I don't think they could accomplish much if it wasn't for the brainwashing of people in college and of course through the teachers in high school and grammar school and also through newspapers and magazines.

One of the most absurd things I ever heard of is this business of talking about big oil as ~~xxxxxx~~ being responsible for this terrible thing, and we may to pay \$1 a gallon for gasoline whereas in England and Germany I understand they are paying \$2.40, for it and it is the Arabs that are raising it, and even in the programs on TV and magazines you'll find people saying this is all a conspiracy of big oil against ~~xx~~ us. And that gives fertile ground for the communist conspiracy to work in and they are working very effectively.

Neher: How specifically would they use that?

It simply gives an atmosphere in which they can get a group of people who are upset. These anti-nuclear demonstrations they have all over. There are some thoughtless people in them who think how terrible a nuclear ~~xxxxxxxxxxxxxxxxxxxx~~ ~~xxxxxxxxxxxxxxxxxxxx~~ devastation would be and simply from a feeling of goodness and fear are doing this, but certainly a lot of it is stirred up by people who are trying to stir up people to make difficulty.

In Russia and all the communist countries they are building up their nuclear energy as fast as possible. If they can keep us from getting it, it weakens us all around. Certainly there is an organizational force back of it that I don't think is controlling it but is seeing that there is an opportunity to do something that weakens us. And they will try this that or the other. Certainly the terrorism that there is at present in Germany and in Italy and the Palestine Liberation Organization, well these are individual local groups, often people who have been propagandized in their college courses, etc., but they are furnished with materials and weapons and given training by the communist groups.

I don't think the communist groups tell them exactly what they should do, but they give them the means to do it and they encourage them and push them along in those directions. So that I think we need to be on the watch to do anything we can to prevent these things, but I don't think that all the Christians together in the country could make a great difference with what the
