

things we should look for. As I mentioned, we had various short trips. ON one of them them, when my ankle still was not very good, we were down in the foothill country and found we had to rush to catch the train back to Jerusalem. With ~~in~~ my ankle the way it was I could not go as fast as the rest, and so ~~f~~ Daug near the valley of Elah, where David and Goliath had fought, I saw the train pull out and the minister from N.Dak° and I were left behind. Dr. Albright had said to us, "If you can't make the train, there is a Jewish colony here; you can stay there overnight." We went to the Jewish colony and talked to hte head man who arranged for us to stay with a cert~~ain~~ family. WE got with the family and there we found difficulty in communicating. When the professor from N. Dak° wanted to ask a question he woud tell me in English what he wanted to say. Neither of us could speak modern Hebrew well enough to communicate properly with the people. So he would ask me a question, or he would tell me what he wanted to ask them, in English. They brought in a neighbor who knew German, and I would translate it into German, but he didn't know modern Hebrew, so he would translat it from German into another language, to the man of the house, and he would translate it into modern Hebrew to his wife; she would give the answer and go back through all that to get back to the minister from N Dak°. /After/^I got back to America I saw pictures of the that colony being burned in an Arab uprising.

rib (?)
 On ~~the~~ this trip the man from ND° kept trying to rip the Scotsman. He would, for instance, at this time the word AEF was well known, which had stood for American Expeditionary Forces, describing the American troops who ~~went~~ had gone to Europe ten years before. The minister would keep referring to AEF as "after England failed," and he was ribbing them quite a bit. But they got along quite amicably. Later on one of our graduates from Faith took a degree doctor's degree in Glasgow with this Professor Mauchline, and told me that he remembered me.

We often took short ttrips in the Jerusalem area and then the plans were made for the big trip which was to be on ~~the~~ horseback. There were only four of us in the party, but there were several muleteers. They had mules carrying our stuff, tents, etc. The party that went consisted of four ~~people~~ people, Dr. Albright,
