

place mentioned in Genesis 14. He was very ~~xxxx~~ thrilled when we found near the modern town that bore this name, about a mile from it, we found a hill which on which you could see the outcropping of a triple line of fortifications showing that ~~xxxx~~ there had been in ancient times a fortified town there. We found pottery from the time of Abraham. /He said that that the fact that Genesis 14 describes the people as having attacked Abraham, or -attacked the cities of the plain, Sodom and Gomorrah, etc., coming through three places that are named of which the middle one is Ham, suggested a route very different from the usual travel routes which usually travel furt-er north, over into the coastal plain, ~~xx~~ instead of coming down here through the eastern edge of Palestine. But, finding that there was indeed a fortified town right at that location at that time, and the name ~~xxx~~ "Ham" preserved in a village nearby to this day, was evidence of the accuracy of the Biblical account. Dr. A° often found such evidences as this of the accuracy of the book of ;enesis. He was was very excellent guide for the party and had many interesting things to tell. He was a most intere sting man in many ways. I should say a good bit more about him but will stop for now.
