

to that which we consider to be right. But among conservatives as among people who take the opposite view on many things, among all of them, you will find a conservatism that is harmful. That is a tendency to go on doing something in just exactly the same way simply because you have got the habit or your father had the habit or your grandfather had the habit, and you keep on doing that way. Just like our crazy system in the United States here of ~~xxxx~~ speaking of twelve inches in a foot and three feet in ~~xx~~ a yard and how many yards in a rod and how many rods in a mile and you get into that. It is perfectly fantastic <sup>for</sup> ~~any~~ people with any intelligence to go on in such an absurd way and yet we just keep right on because we have done it for generations.

In England they do the same thing with their money. I ~~xxxx~~ remember ~~a~~ *hearing of* an English woman who was in Italy. where she said, 'what crazy money system they have do<sup>w</sup> here. How many is there in 2-2 1/2

Oh, yes, a hundred, isn't that crazy? Won't it be good to get back to England where things are simple where you have twelve pennies in a shilling and twenty shillings in a pound." Well, she is used to that in England. You figure up

2-3.

which means that two shillings each of which has twelve pennies in them and then six pennies. Get this book here and it may be two ~~xxxx~~ pounds and three shillings and six pence and when you add them up you have to remember it takes twenty in this column ~~xxx~~ to make one here and it takes only twelve here. I got all ~~xxxx~~ mixed up when I tried to keep ~~xxx~~ track of it, and I felt toward ~~it~~ *them* then just how any sensible person feels toward our system of inches and feet and yards that we have over here. We ~~are~~ <sup>get</sup> used to doing a ~~certain~~ thing ~~that~~ *a* ~~a~~ certain way and we just keep on. Well, that's the sort of conservatism that we don't stand for I hope at Faith Seminary. But every individual has a certain amount ~~ix~~ of it in his system. Just cling to a thing because that is the way it has been done. Well, how did it get to be done that way? It's often much easier to get people to figure out the right way of doing something or to
