

meaningless, because it is dealing with factors which are outside the experience of a man, beyond his ability ~~to~~ in any way to handle or control a proof. It is meaningless and the question and thing. ~~It is~~ purely one of philosophical speculations, ~~not~~ in any sense, one of

scientific observation. When we get into ~~theology~~ the ultimate questions of the work universe, we have certain things revealed to us in God's ~~word~~, and we can be sure that the science can never discover anything, in ~~what~~ fact, which contradicts a statement of the Scripture. We can stand upon the statements of the Scripture, knowing that they give us a comparatively little information in these areas, ~~but~~ When it comes to philosophical interpretation/ to understanding of the meaning of the purposes of the existence of the its origins or its ultimate end we learn a ~~of~~ great deal from the Scriptural statement, and ~~we find that~~ beyond that, anything which we say is subject to constant reevaluation, because so often human thoughts ~~of~~ examination can prove nothing. It is only observation and careful scientific ~~investigation~~ or else careful study of God's word that will prove anything/ in this sphere. Scientific study can only deal with those ~~of~~ facts which can be reached by us. Study of revelation can only deal those facts which God has ~~revealed~~ chosen to reveal in His Word.

A great scientist ~~once~~ ~~he~~ said that he was like a child walking along the shore, picking up a few shells here and there. With all ~~the~~ ~~the~~ tremendous advances in science/ ~~we~~ are still/ exactly the same situation. Knowledge is infinite. Only the infinite God ~~can~~ knows it all. We are picking up a little here and there/. We are making tremendous strides, but compared with the infinite potential knowledge they are tiny indeed. Genesis reveals a few facts to us of tremendous importance about cosmology, of tremendous interest to our lives and this activities. It reveals a few facts in ~~the~~ area that are helpful to us as see the science approach in understanding of them <sup>can</sup> we say, Isn't this wonderful that it was revealed to Moses, that God revealed to Moses that there would be light
