

(1) But when I got to speak, I said, (2) ^{it was my turn} as far as the flood is concerned, (3) ^{pointed out that} the earth (4) ^{became inundated} was flat, and was covered with water, (5) ^{if Genesis taught that} I would think the water would flow out off from (6) ^{both} the sides, (7) ^{covered} The story of the whole earth being invaded by water, (8) ^{for you, not} sounded to me more like something that infers a round earth than a flat earth.

Lynn

The Bible speaks of the four corners of the earth. We speak of four ~~the~~ directions. It is a reasonable ^{way} to refer to directions. ~~To say that~~ To say that the ~~earth~~ word "corner" here is to be taken ~~in literal sense~~ as referring to ~~explaining~~ and implying a flat earth instead of a ~~flat~~ sphere is putting into words meanings that they do not contain. Unless one resorts to this sort of twisting, we do not find anywhere in the Bible teaching that there is a flat earth. The Bible does not contradict any ^{the} ~~real~~ ^{factural} discoveries ~~in~~ ^{of} ~~the~~ ^{the} science.
