

Our subject today is Genesis and Cosmology. The word cosmology is used today ^{to} ~~as~~ refers to the nature ~~and~~ of the universe as a whole.

Its emphasis is not on this particular earth, but on that which lies outside of it. Upon this earth only in so far as the matters about it. ~~W~~As we learn matters about it, which are equally relevant ~~and~~ to other spheres. ~~E~~

~~The Greeks:~~ The Greeks used the word ~~kosmos~~ cosmos to refer ~~to~~ to the whole of the existence ~~of~~ outside their immediate town area, and now the word has been restricted to this broad sense, to this very specific idea. The natural place to look for this ~~information~~ ~~is~~ on cosmology is in Genesis one.

Genesis tells us about the beginnings of all things. We naturally expect

that it will tell us about the beginning of the ~~entire~~ cosmos, something, possibly something about its constitution.

cosmos

The conception of ~~cosmology~~ has been tremendously extended in recent years. ~~A few years ago, I was a member of a club at a great university, where~~
