

1. - excellent

We now know that the universe is more like this. Then he filled up ~~out~~ the other half of the blackboard with an entirely different picture. Of the two, somewhere in the middle of the lower left hand corner, he made a drawing of ~~the~~ a disk ~~shaped~~ shaped ~~galaxy~~ galaxy of the stars. Towards the outer of this, ~~he~~ he indicated the small star as our Sun, and with planets, with ~~of~~ various ~~planets~~ planets revolving around it, one of which was our earth. Then at random over the rest of the blackboard he indicated other galaxies ~~to~~ filling up most of the blackboard, and showing that they reached far beyond the observable universe. There is no room left for God at all.
