

the system of muscles and the million rods and cones in back of it and all the elaborate nerve equipment there," he said, "this eye can not only see shapes in front of it but it can see colors; and not only colors but it can get an idea of distances, and it can adjust itself automatically for distances near and far. And not only that, but you have two eyes and yet you don't get two pictures, they fit together to make one picture." And where is that picture, and how ~~MM~~ do they ~~fit~~ fit together/? But it makes one picture, where you get depth and distance. What a marvelous thing the Creator has done in giving us our eyes. It's a miracle; it's beyond our understanding; but, here we have it - it's a fact of experience.

And I believe that this Bible is a fact of experience by which many a man has been turned from darkness to light, and from the power of Satan to the power of God, through the action of the Holy Spirit. And I believe that God wants us to accept it as His truth, but to study it to see what it says - not to be satisfied with superficial interpretations, but to get into it, to understand it, and above all to put our emphasis on its central teaching which is that man is lost in sin, but Jesus Christ, God's own Son, came to earth and died on the cross, that we through simple faith/^{in Him} should BE SAVED and changed from the kingdom of darkness to the kingdom of light, and made citizens of His eternal kingdom. Thank you.
