

Many attacks have been made against the Word of God. One of such attacks which ~~put forth~~ was ~~forcefully~~ brought ~~to~~ my attention a few years ago the publicist *G. Wells* was made by a noted English publisher, H. D. Welsh (?) Welsh originally wrote an article ~~wh~~ for an English magazine about education, and then the article was printed in an American magazine. *A/* In the article in which he discusses the English education well expressed his sorrow that so much time was heaved but was wasted on studying a little country like ~~Pla~~ Palestine which had, he said, no great historical importance, and no real significance for people of England.)14.25) How much better it would be, he said, if English education devoted its time to studying England, its; history, and its background, and its conditions, instead of wasting on a little ~~o~~ town, a place like Palestine. Now, Welsh... eloquent in his ~~denunciation~~ of spending the time on the matter. He says, nothing of importance ever happened in Palestine. He said, the only time when Palestine had a period of any real greatness with the time when it is said... the king called Solomon, even the greatness of that king ^{is} ~~was~~ tremendously exaggerated. After all, he says, Saul was a petty king... a subject ... either a hirem of ... or the, ~~hero~~ ^{pharaoh} of Egypt. He said, Harem.. He said Solmon tried ^{built} the little temple that Harem ~~bought~~ for him was like a _____ of Chicago in the big automobile that his employer has just purchased.

As one reads these statements of _____ one is amazed at the way which allows his prejudices ... to carry him away from clear thinking in the first part of the statement. He says nothing of any importance that has ever happened
