

time and so I must rush out that door as soon as I finish speaking, or whether it will be late tonight and I can stay around and greet some of you as I would like to. Possibly someone is going to phone on my behalf and ask the railroad station to make a similar prediction at 8:30, but I have found that even when the railroad station predicts that a train is going to be on time sometimes you stand around 20 minutes in the station before the train goes. It is difficult to predict the future. I happened to pick up a copy of an old magazine somewhere, and I saw a subject on the front that looked interesting to me. It was January 1940, and the title on the front of the cover said, "A famous astrologer tells what is going to happen in 1939, so then I looked at the date on the magazine and the magazine was dated January 1939. I thought it would be interesting in January 1940 to see what an astrologer had said in January 1939 was going to happen that year, so I looked into it. It must have made very interesting reading in January 1939, but it was still more interesting in January 1940. It said that this astrologer in Hollywood was much visited by prominent movie stars and even leaders of government, who had asked him to tell what the future was, in order that they might make their plans accordingly. And so this magazine had asked him to give its readers the benefit of his knowledge and tell them what was going to happen in 1939, but I was reading it in 1940. Now what did he say? He said, There will be no European war beginning in 1939 (and you remember it didn't); he said, in 1939 Hitler will die a violent death (and if you know, he lived 6 years after that); it said, In 1939 President Roosevelt will make a declaration that he does not intend to run for a third term (Laughter)(and as a matter of fact he not only ran for a third but for a fourth as well). It made about 10 predictions of what would happen in 1939, and ONE of them proved correct,- that is not a very good average, is it?

I picked up a magazine one time, issued by a University Graduate
