

the authorized version, I wonder if those KJ translators got together and said, now is this talking about the whole globe, or is it talking about just a section of the globe. Which is it? Shall we translate it earth, or shall we translate it land, and perhaps some said earth, and some said land, we'll have half the cases translated earth, and half the cases land. And that's what we have here. Just about half earth, and just about half land. And actually the passage is a unit from 1-12...8 $\frac{1}{2}$ .. end of recording.
