

group of one person in 200 of the Russians would have control and he worked out a system. Well, when Lenin died everybody thought Trotsky would take over. Trotsky was an able man who had organized the army and who was a good administrator and everybody thought Trotsky would take over, but there was one man there who understood Bolshevism better than Trotsky. And that was a man whose name was Joseph Bizarunivitch (1 3/4) but he had written under the pen name of Steel or Stalin, Joseph Stalin. And Lenin, if he had lived another six months, was going to get Stalin out of the party. Lenin left a testament in which he said we should not give power to this man Stalin, he attacked Stalin, he was opposed to him, because instead of pushing ahead on the great issues, Stalin was working to get himself into control, but Stalin was like Lenin, a student of power (2 1/4), a student of control, and with a little tiny group running a great majority (2 1/4)

Stalin was the logical man to continue.

And so Stalin got (2 1/2) to join with him, he said this man Trotsky is too big, let's us three unite and we'll be bigger than he is. Well, they worked with him and they got rid of Trotsky and then as soon as they got rid of Trotsky then he went to the bitter enemies of (2 3/4)

and he said you join with me and we'll get rid of

so he worked with them, got rid of

and then after a year when he was rid of them, then he brought (3) charges against these two who had worked with him and he got rid of them. And in the course of the next fifteen years he killed practically every one of the old Bolsheviks, no one was to be allowed to aspire or have control there who in any way, who might be a danger (3 1/4)

And Stalin was devoted to the principle, the fundamental principles of Lenin. This is a world/movement. Russia is only a start. We're out to get conquest of the world, but in order to do that we have to keep on by controlling Russia, we're only a tiny group in Russia, we must get our control here, we must hold it here, we must extend it over the rest of the world, and we must make our principles complete and effective everywhere, and they have been working, poured that in, under Lenin's principles, which are the most ^{effective} ~~fantastic~~ way ever devised to make social
