tar to .vocu .baccos and apola S .item of ber And yet the theories that were originated before it was realized -- that were originated when we were s under the force of these old Wolfian attitudes, are today beginning to be taught in our S.S. and are getting into our popular magazines. The evidence for these theories has largely been disproven in case after case we can show the remarkable accuracy of the OT. Wrainin ond mine interior

I picked up a series called Know Your Bible. I was going through fit and its amazing bow wiren often it says "scholars have discovered this," scholars have found this to be so," Well the scholars who have found this so are largely under the influence of the Wolfian theory. The evidence that has come to light in recent years completely contradicts that approach to the Bible. We can trust the Bible as it stands. It is reliable. It is dependable. Of course there are places where a little error in copying has come in. That has happened occasionally. But it does not affect any vital doctrine. Rarely even does it EXEEXX even affect any minor historical statement.

The facts of the Bible are given as written by the original writers. There is no reason why we should not believe Moses wrote the five books of Moses; that Mat., Makr, and John wrote the Gospels and that they told what actually happened and that the Holy Spirit kept them from error as they wrote. Oh how active Satan is to destroy people's faith in the Scriptures. He knows his time is short. So while our Lord tarries, Satan is trying to destroy people's faith in the Word. But how wonderful that God has raised up from the dust of the ages new evidence in recent years to show that his word is dependable. May we not be satisfied with knowing its truth. May we apply it to our lives andhearts. May we take of itsteachings and make them the bluprint for our lives. May we bring our thoughts into conformity to God's Word. 11142-1
