happy life of joy in the Lord, and the answer to it is right here in

look for it

but the best solution to it is if we apply for it/and use it... is found right

its

here. It is the sin which has the-working of-our- out in our feelings of

pride, our feelings of legnlonging and our feelings of frustration. The lust

of the flesh, the lust of the eye, the pride of life, we are told, John tells us,

all that are in the world are to perish, but he that doeth the will of God abideth

forever. But when we crush them into our mind and we have unconscious longing

just

for them, God does not want us-to-- us to/force ourselves to be good. He wants

us to be- take the things and bring these things to the foot of cross and

see what is right and what is wrong and in the light of the Lord Jesus Christ, and

learn what His will is for us, and- and go forward and rejoice in Him, and here

c

it is in the Bible already ... only if people would study it carefully and get

beneath the surface and see the wonderful truths that God has in≠ His word

for us. Now, in this- these morning sessions we have been looking at various

evidences in the Scripture about the tu truth and dependability of the Word of

God, and most of what we have said so far has dealt with the written documents

have

which had-been found from ancient places in the excavations, and you have noticed

that most of those which I have called your attention have been found either

in Mesopotamia or in Egypt. I would like to mention certain written documents

which have been found in the North of Palestine. Here in the North of Palestine, near in

the little- middle east you get into the region to which Jacob went, when he was

up there for a number of years, and there he married to Leah and Rachel and there

he had the eleven of the twelve sons of Jacob were born, and then he came back

to Palestine, and we had practically nothing from that area until comparatively

recently, and then in 1926, and then starting with 1926 we found a great number

of tablets, cuneiform tablets, like those from Babylon, over in the place in

the-norder-
