

it to the next generation. The implication certainly is, the time has now come when the Lord is going to allow Jeru^o to be destroyed. As you look at international conditions today, you see the way the ~~Communist~~ Communists are ~~not~~ constantly extending their force, conquering more and more areas, becoming stronger and stronger, and as you see the way that the Western nations are drawing back into their little personal jealousies and spite spites against each other, and are cutting down on their ~~own~~ forces and the way that ~~they~~ the nations are being filled with Communist propaganda, you just wonder whether we are not in a similar situation. You just wonder whether something of the misery that was ahead for them might not be ahead for us. I was reading yesterday Michener's account of the Kent State situation, and he told how when he went there to look into it after those men had been killed there, he went and stayed some weeks and gathered material, and wrote a book about it. One of the professors in the university came to see him, and this man said, "I hear you are gathering material; I thought maybe you would be interested if I would talk to you and tell you something about the situation." He said, "I certainly would be." "Well," the man said, "I want you to know my position," he said, "my viewpoint," ~~he said~~; "I am a Libertarian / Communist." Well, now, for this professor to say he was a Libertarian Communist showed ~~libertarian~~(?) showed how very, very deeply he had been brainwashed, because that's like saying that you are a white blackboard. It is just an absolute contradiction in terms to speak of a libertarian Communist. What he meant was that ~~he~~ he was one was against all the controls in our present nation, against all of them, but who desired to substitute it (?) the Communist system which he either does not ~~he~~ know, or does not realize, or ~~tries~~ tries to forget the fact, ~~that~~ that (?) libertism (?) would destroy all liberty, ~~and~~ and make everyone the slave to the state. But
