

The leaflet that ~~we~~ can purchase for sale ~~there~~ there tells how a ~~group of Italians~~ ~~of~~ glass makers were brought here to ~~introduced~~ introduce a new industry to America, but it lasted less than three years. ~~2/~~ Several of them went to the Indians and told them how they could beat the settlers and rob them and urged ~~them~~ the Indians to do everything possible to injure the settlers. Chief Powhatan decided that men whom their/<sup>OWN</sup> nation ~~was~~ could not trust would turn against him/<sup>also</sup> ~~too~~ if ~~the~~ he ~~put~~ put confidence in them, so he killed them, and the beginning of glassmaking glass making in America disappeared until a much ~~later~~ later time. It was only after repeated sendings of new settlers and new funds/<sup>from England,</sup> and great expenditures on the part of the British ~~was~~ nation that a viable settlement was established.

In ~~At Plymouth~~ The ~~group~~ group that came to Plymouth had a different purpose in mind. They did not come ~~seeking~~ seeking gold or expecting to make a fortune but looking for a place where they could serve God in accordance with the dictates of their conscience. (s?). When this group met in Holland to consider going to the New World their beloved pastor, John Robinson, ~~asked them~~ said that he would stay with whichever group was more numerous. If the majority of the Pilgrims should decide to go to America he would go with them; if the majority should stay in Holland he would remain there as their pastor, hoping that he might go to Amer<sup>o</sup> with a later group. Those who were willing to face the dangers of pioneering life ~~were~~ were less than ~~at~~ half, so Robinson Mr. Robinson (?) stayed in Holland and died there (not long afterward?).

This ~~little~~ little band that came to Plymouth had humanly no hope of survival. They knew nothing about the country to which they came.
