

I was happy to hear that the two planes that let him on have been fined \$1000 each for not carrying out their regulations. But what do you think of a man claiming to represent the people of the nation and putting No. 1 against the welfare of all the people. There might be hundreds of people killed with -- as a result of hijackings and there probably will be some of these days if they are not stopped when some planes crash as a result of them and a man is so proud of his dignity. But Oh any one of us can feel proud of our dignity and what people think of him(me). We don't need to look --down on Sen. Hartke. Look at your own heart and see the sin that is there. /

My father was a physician in a mining community. This was 60 or 70 years ago. They did not have the serum that they have today that makes it possible to protect against many diseases which in those days were terrible killers and which required in those days that if a person had one of those diseases -- diptheria, scarlet fever, something of that kind, their home would be strictly quaranteened. My father used to when somebody got scarlet fever or diptheria ~~he would have~~ the health officer would have to go at his request and would put a sign on the door QUARANTEENED, and would name the disease, and no one was supposed to go in or out. They could deliver food to the porch and then they could take it in and only the doctor was supposed to enter. He had a case of diptheria there in the town one time where he put up the sign, and for a week the people were to be strictly quaranteened. In the neighborhood there was a bunkhouse where 80 single men lived who worked in the ~~mind~~ mine. ^{One} of them was a good friend of the head of the family where the quaranteen was. He knew his friend would be lonesome. He like to see his friend. He said, I'm immune to diptheria. I don't need to worry about it." He sneaked into ~~the~~ through the back door at night two or three different nights and spent a couple of hours with his friend. He did Not get diptheria. He was immune to it, but he carried the germs on his clothes and more than 50 men were taken with it and 30 of them died. Look out for No. 1 -- that is the spirit of sin. The deadliness of sin.

And then we turn to another side. And we see the Penalty of Sin. The wages of sin is death. Oh the attitude today is, What's the difference what a person does. There were two fellows in Washington just last week who say a man coming out of a house, and these
