

use the word soul which is commonly the translation of *pseuche*, we use it commonly to represent what is *pneuma* which is ordinarily translated spirit in the Bible. It is peculiar the way it works. Mixed up and twisted around but the idea I think is very clear.

X The Limits of Our Knowledge. There are matters which we can learn with absolute certainty from the Bible. There is no other way to truly know anything except as God has revealed it to us. But in the nature of language, in the nature of human words, in the fact that He gave us a volume of this size rather than something made of books with print small enough to fill this whole room, why there are many many things on which He has not revealed

People go to the Bible and say, Is it this way or is it that way? And they say it looks somewhat this way, but a little this way, so this must be the truth. And I go to the Bible and say, Does the Bible say this? Does it say that? Or does it not give us the information on this particular subject, or at least does it not give us information on this subject that in such a way that I can with my present amount of Bible study really be certain on it.. I feel it is very important that we remember and keep in mind the limits of our knowledge and not go beyond them. Paul said that if this earthly house of this tabernacle be dissolved, we have in heaven an eternal dwelling not made with hands. This flesh is a temporary dwelling. It is a marvellous thing that God has given us. I don't think that any of us realize how wonderful is the physical structure that He has made available to us.

I figured up a few years ago, I do not remember the exact figures, but if I recall correctly it was something like this, that if you took the cells in one ordinary human body and you put them about an inch apart they would go many times around the earth, the cells from one human body. And every one of these body cells - that's not counting blood and moving things - but body cells, every one of these has within it the chromosomes representing all the qualities of that entire human body. It just staggers the imagination
