

also are differences . We do not ~~pro~~ reproduce after our kind in the sense of being identical. Gradual changes can take place. There is no question. The question is , Is there evidence to show that all life developed from one simple form by gradual processes . ^{Is} ~~If~~ there were evidence to show that man developed ^{out of some} by gradual processes ~~from other~~ pre-existing ~~forms~~ type of life. Here ~~se~~ we must say, this is purely a matter of ~~a~~ faith. There is no evidence for it. There are similarities, but similarities do not prove development. A man can build six houses in a somewhat similar plan but this does not prove that one of the houses developed from the other. It would be silly to say that God would have to have an entirely different plan for every part of ~~his~~ His creation. There can naturally be similarities ~~in His~~ within His creation. These do not prove that one part developed from another. However, when it says in Genesis that God created ~~the~~ everything to reproduce after its kind, we do not know how many kinds God created. Are all of what we ~~can~~ call different species today separate kinds that God created. In ~~the~~ at least 90 % of them, probably in 98 % there is no proven evidence that ~~ne~~ ~~ne~~ one has developed into another. One what ~~Ge~~ scientists ~~x~~ would call species has ~~not~~ developed out ~~of a different~~ what scientists would call a different ~~specie~~ species. There are few, ~~xxx~~ if any cases, where such development from one species to another can be proved, but suppose it can be proved. It would not in any way contradict Genesis. Genesis does not say that these species are what God created. Perhaps what we ~~can~~ call genera are what we ~~can~~ ~~call~~ God created. Perhaps what we call families are what God created. It might ~~even~~ be that what we call orders are the kinds that God created. ~~Whithin~~ within each of these, certain development proceeded. There is no proof ~~x~~ at present that ~~he did~~ He did not create most of the separate species as we have today as separate entities. ^{What} There is no proof of this but ~~ne~~ neither does the Bible say He did / The Bible says ^{is} that God created a large number of different kinds of ~~plant~~ plants, and a number of different kinds of animals, and that man was a separate creation, not ~~x~~ made out of ~~k~~ any pre-existing life. Genesis 2 says that God took of the dust of the ~~ax~~ earth and breathed into it the breath of life, so this ~~does~~ dust was not ~~living~~
