(S)

the first great Cause make that ^{that of} ^{evolution} ^{it} ^{out} even so his rules are the clear teaching of the Bible that God not only created the world but that He controls it and has directed it at every step or stage of its movement. And of course, this philosophically rules out our view that man has sinned, man is lost, and it is only through the Lord Jesus Christ that he can be saved. That doesn't physically come into contact with Evolution but it comes into contact with the whole idea the whole attitude. This idea that everything is getting better by natural processes, just natural events that are bringing the situation into existence as it has occurred. With the big basic philosophy of Evolution then we certainly cannot agree, and there we must take the stand.

Now as to details of it. If we believe in the Lord Jesus Christ, we must take the attitude that the Old Testament. And to the Lord Jesus Christ the Old Testament was God's Word and was true and was free from errors. But, oh, how they read into the Old Testament things which are not there. I had a sort of debate with the president of a liberal theological seminary and with a student group in the university in N.J. which asked about the two different views of inspiration--liberal and conservative. We each had twenty minutes to present our view. And then they had opportunity to present questions to either of us and then we had time to give our answer. So that he would answer questions and I would talk or I would answer questions and then he would talk. And it was handled in a very nice calm dignified way all through except at one point and I fear that was my fault at that point. Because as I sat on the front row and he was talking in answer to a question, he said, Well, of course, the Bible teaches that the earth is flat, and I couldn't keep quiet/ I said, "Where?" He said, "the whole Bible." I said, "Where?" "Why," he said, "all through the whole Old Testament." I said, "Where?" "Well" he said, the whole book of Genesis teaches it." Again I said, "where?" Then he hesitated a minute and then he said it teaches the story of the flood about the earth being covered with water. Surely that teaches that the earth is flat. When I got up I said that the story of the flood, if it showed anything, showed that the earth was round, because if it was flat all the water would have
