

and I was a guest. A student club which is composed of the brightest students there in the university, that is to say, many of the brightest are in this club. It is very difficult to ~~x~~ get into it. It is ~~in~~ endowed ~~and~~ and there is very special financial help for those who go to it, given by a wealthy mining man from Colorado who ~~x~~ has named the club after the ~~w~~ town in Colorado where he secured his ~~wealth~~ , and he said he was going to train great leaders for America through the particular training he gives there and the associated place in California, and I spoke there on Friday, and Saturday, and Sunday morning and ~~x~~ then Sunday evening at the club, they had a meeting . I was leaving late that evening , so I was able to stay for their meeting. They had a meeting at which the Professor of Philosophy in the University , a very well-known widely used professor, Professor Burt who has written a number of ~~/works~~ on the philosophy of religion, and who I believe ~~x~~ is an ordained minister in the United Presbyterian Church, U.S.A. Professor gave a lecture, a short lecture, to these students and there was a blackboard there, and he said what a tremendous change has come since the Middle Ages. In the Middle Ages ~~peopl~~ people thought of it this way (he drew something ) here's the earth, and here are the ~~planet-~~ planets going ~~are-~~ around the earth, and here ~~are the~~ is the sun going around the earth, and then here are the stars outside, and then here is all this area that is God and he wrote God in big letters . Well, now our studies have completely changed our understanding of the universe. Now, we know that the sun is in the center and the earth goes around the sun, and the other planets around the sun and the stars that we see are mostly in our little galaxy, and there are a billion other galaxies billions of miles away from us and it ~~com-~~ covers all of space and it ~~he~~ ~~just~~ just erased the name God. There is just no space left for God and anywhere
