

stand His truth let us admit the fact, admit the mystery.

But now I want to mention about God's marvellous plan, His wonderful plan, I want to mention two very vital portions of it. Not as vital as the portions I have already mentioned perhaps, of what we know about His will for salvation through Christ, about His will for us showing people how to grow in grace, but yet, I believe, a very important part/our <sup>of</sup> understanding of His will for us.

I will call it point 3 and 4. No 3 is, You have a part in God's plan. I believe this is very clearly taught in Scripture, and I think it is very important for us to realize. But I want us now not merely to realize it but to look at some important aspects of it. We have, each one ~~mx~~ of us a very important part in God's plan. Now, why should that be? Why should God need us to have a part in His plan? He could make a machine that would be so programmed that it will do all sorts of things in exact wonderful fashion. God has made a wonderful universe like that. The stars, the planets move in thier orbits so regularly that we can tell within a few seconds ~~the~~ exactly when a planet will pass behind the sun, or how long it takes to go around the sun. Marvellous clockwork that the Lord has created, a marvellous machine. Our human bodies are a machine beyond description, beyond imagination as the various parts of it work together so marvellously. Think for a moment of the human eye. Helmholtz the German optician said that the lens in the human eye was such a poor optical instrument that for a few cents you buy a better one in any optical shop. But he could not get a machine that any man has ever made that could do what the human eye can do because every human/has most marvellous <sup>eye</sup> potentialities. Not only does it recognize shape, it recognizes color. Not only does it
