

the Word of God at that time. Then just a few years ago, a young man from that institution today came over to visit a friend in our institution and the friend brought him to see me to tell me about situation of that institution now. He in their classes today they were denying everything in the Word of God. He said, They are teaching in their classes today there is nothing wrong with adultery at all! So completely have they gotten away from moral Christian principles today. That was one of the two institutions that were standing for the Word of God at that time. It simply shows how the devil has been gradually making these changes.

About 60 years ago there was a ~~movement~~ new institution founded in New York. The leaders said, People are saying so much time is spent on Greek and Hebrew. We want them to learn to know the English Bible."I think they have a wrong point there; the Bible in the original is what matters. But they had a good point which was that many of the old line seminaries spent all their time spending a few small sections and never got to know their Bible as a whole and if you learn to know it as a whole. To know it as a whole you have to study great parts of it in your own language. You learn to study in the original for key passages and for great light it shows there, but you must read it in your own language. That was their great central point. That institution did not stand four-square on complete inerrancy of the Word, but their deviation was comparatively small. Their great stress was on knowing the English Bible and on presenting the great doctrines of Scripture. That institution soon grew to be quite a strong institution. They had many graduates who went out and did a great work for the Lord.

The first intimation I had that something was really going wrong with it was when I was at a student conference in Canada.
