

Versailles Treaty . The German Chancellor had been trying to get the Allies to give them relief from these impossible restrictions and they were refused every time. Hitler simply broke one, and the Allies said, Well, don't break any more! Then they broke another and said we won't break any more. They then broke another and said, We won't break any more -- don't you break any more. Then his armies marched out.

He was so determined to exterminate the Jews. None of his leaders except one or two had any interest in that but they did what he ordered them to do. He put so much energy in that and so much expense in gathering the Jews together and putting them into concentration camps and destroying them that perhaps they would have won the war if all that energy had been put into fighting and into advancing the war effort!

We all know what happened to Hitler. Then we destroyed all our armaments. We did away with our draft. We did away with our efforts to have any military force because now we have a United Nations and we were so sure we'd have peace forever as we were after the first world war when they had the League of Nations. Peace and safety forever!

But the Russian forces have made that which they have in mind every bit as clear as Hitler made his intentions clear. They have been made perfectly clear, and yet Carter goes and kisses Brezhneff and makes treaties that we will not build up our armaments. And we don't know what they will do. They say. Truman said the Russians have made 300 agreements with us and they have broken every single one of them. The grandson of Winston Churchill said the other day that Russia now has a tank force 20 times as great as anything Hitler ever had. They say that we have enough force to destroy everything in Russia and the Russians have enough force to destroy everything here. But the fact of the matter is that the Russians don't care if they kill a few million, they have plenty left. And if 50 of our people are seized by the Iranians our whole nation is concerned about them, of course.

The Russians have a system that everyone is trained to go into shelters on notice at any time. If their land was covered with atomic bombs at least half of them would be able to survive in their shelters. We have treaties we won't have no more than so many missiles -- but it does not say how many separately targeted parts you could have on each missile. We put one or two on ours and they put eight or ten! on theirs!. In Hitler's days he could fight and ravage Europe for two years and they could not get across the ocean to us! We had no army; we had no forces. Our men were practicing with using umbrellas instead of guns to carry on their shoulders for a year and a half. The ocean was there and we were perfectly safe. The ocean no longer has any
