

preponderance of the American nuclear power after the war and it won't take much to gain complete control.

But they don't simply put all their eggs in one basket. Cuba was taken over and there we have 90 miles from our shore we have nuclear weapons. We have men trained who are sent all over the world to fight wherever there is a chance of winning control. I feel very sorry for the millions of people in Afghanistan who are suffering as for six years the great numbers of Russian troops have been trying to bring that country under complete subjection. Millions have been killed by them. But you know who I personally feel sympathy for? I think of the young Russians who reach the age of 18 or 20. They are immediately ordered into the army, sent wherever they are ordered. No say whatever what they are to do, and 100,000 of them sent to Afghanistan to face people who naturally feel ~~as~~ as anyone would feel if they were attacked the way the Russians have attacked Afghanistan these six years. Sent there to fight against them, to suffer, to die in trying to bring them into the sort of subjection that everyone in Russia has suffered for these many years.

So we have in Nicaragua a strong beachhead. It is easy to see what will happen. Let them get control. Today they are making all the young men appear for military service, for ~~training~~ training in order to conquer neighboring countries. Let ~~hem~~ them reach Mexico. Have you ever noticed that there is agitation and upheaval in other countries, but you never hear of any in Mexico. Mexico has terrible corruption. In Mexico each President as he has retired after six years has taken with him tremendous sums of money. The graft in Mexico is tremendous. Great oil resources, but the money has gone into the pockets of the officials. The people have had to suffer inflation after inflation. Yet you never hear of disaffection or trouble in Mexico. Why? Because the communists are not ready for it yet.

But as far as a situation where it could be developed quickly, Mexico is as bad as any country in the Americas in that regard, as a possible place. What will happen when Nicaragua gets the nation next to it and next to it and as Mexico is gradually taken over. Millions of people rushing across the Rio Grande. Rushing for safety. Rushing for escape. There is no way to keep them out of this country. The country will be demoralized as these millions of people sweep across if it is allowed to go that far.

One or the other of these two lines, unless they think of another also and they proceed under every possible line because a great part of the resources of the country [Russia] are devoted to this sort of preparation constantly. Hundreds, yet probably thousands of spies in this country, and more than that leaders, men working to build up propaganda, to build up opposition to everything that would mean future safety for this country?

What does that do with us? What should we do? There are two important things. If you know the times, if you see what is happening, in the first place, I say, every Christian should put forth preventative measures in the hope that they might possibly be successful. We cannot tell what God has in mind, but God always wants His people to do what ever they can to prevent evil. So in these days when so many people are so utterly careless as to political and national times, only a small group if they would work actively to persuade their leaders to take the measures that would keep the nation strong, to take the methods that would prevent Nicaragua from proceeding on and on to make conquest of the whole Americas as more and more money men and weapons are brought in there. That is an important thing that each of us
