

This was made very clear 70 years ago when the small group of communists trained to absolute obedience to their leaders, in a country which had been bled almost to death by a long war and the people were in very difficult situation, this small group gained control over the Russian people and they declared their intention of bringing the whole world under their control. At the end of the second world war, these people succeeded in seizing large areas of the world and bringing these areas under their control. Thousands of Christians were imprisoned; many of them were massacred. It was strictly forbidden to print the Bible or distribute it. There have been many who have turned to the Lord in spite of these situations.

There are probably more who are really devoted to Christ today in Russia than there are in America, and there probably are more who are really devoted to the cause of communism in America than there are in Russia! (Laughter) Because most of the Russian people have seen its results and would gladly be free of it if they could.

The communist leaders from the very beginning declared their intention to conquer the whole world and they have moved forward steadily in that direction ever since. At the beginning of the second world war--you might say the war was brought on by the action of the Russian leaders in agreeing with Hitler that they would divide Poland between them and they would not interfere with his attack on Poland. But then with this help from the Russians, Hitler had defeated the Poles and taken over a large part of that country, then he turned against the Russians and so in the eyes of many of us they became very fine people who were defending civil rights throughout the world! At the end of the war they proceeded to seize great amounts of territory.

President Roosevelt objected strenuously to their establishing a communist government in Poland, and he declared that the Polish people must have the right of self-determination but the communist leaders seized about a fourth of Poland and incorporated it into Russia and made it up to Poland by taking away an equal sized part of Germany and giving it to Poland and driving out the German people who were living in that area. Stalin proceeded to seize these many areas, to seize N. Korea in which for 30 years the relatives of the people in N. Korea were not able even to get any word as to whether the members of their family were living or dead! They established a tyranny as great or greater than any that the world has ever known. Khrushchev said, We are going to bury you. Statements were ~~xxxxxx~~ very very clear as to what their intentions were.

Now one who occupies a high position in the Soviet power but who has left them and recently declared that in his day, in more recent years, people were told not to make such statements. They must allow the people in the West to go to sleep, and they must not say what their intentions are but the evidence is very clear as to what their intentions are, Up until 3 or 4 years ago (during the previous 15 yrs.) the Russians spent at least double as large a portion of produce of their country in building up of their armaments as is done by any other country in the world. Until the last 4 or 5 years, our armaments had lagged far behind them.

After the war (at the end of the war) people saw the terrible danger that Europe was in. But our leaders declared they are under our atomic umbrella! and the Russians dare not attack them because we have the atomic bomb. While we were ~~xxxxxx~~ sleeping they have built up such atomic resources that if it were not for the threat of our counter striking, we can be sure that the tremendous number of tanks, the tremendous number of drafted soldiers, who have
