

been trained at such great expense would flood across Europe. Now they are ~~trying~~ trying to get us to do away with our atomic weapons and to do away with theirs so they will be left ~~with~~ free without any interference on our part.

In 1975 the nations of the world had ~~not~~ mostly refused to recognize the communist seizures~~of~~ after the war, and ~~it~~ insisted that Russia properly should be within her prewar boundaires. In 1975 at the Helsinkie conference most of of the nations of Europe including the communist nations met and agreed that if we ~~■~~ would recognize the postwar boundaries of Russia, they would promise to give civil rights to their people. The Helsinkie agreements were made and since that time nothing more has been said about driving them back to their previous boundaries. But in Sept. 1976, Russia and her Soviet block ~~refused~~ states refused visas to a special commission of the U.S. Congress set up to check fulfillment of the Helsinkie agreement. They refused that and Orlov and others in Russia who asked that they keep their agreement were taken and tortured. I suppose many of you have seen the ~~picture~~ picture recently of Orlov as he was 10 years ago and Orlov now that he has been freed, and allowed to come to this country. You can see on his face the tortures and suffering he went through simply for asking that they carry out the agreement they had made.

The is one reason and a vital reason why our country is in great danger today. The second reason is equally important. That is that during the last 50 years in our colleges and universities there have been those who have been brainwashed=~~r~~ brainwashing the students against Americanism, against democracy, and all of our journalists today practically have been trained that way. So in our newspapers and in our TV most anything that will look favorable for communism is praised, and most anything bad in it is excused if possible and those who stand against it are mostly misrepresented or condmmned.

When the thought was made that the U.S. could find a strat@ic defence that would negate the power of the Russian bomb to destroy us or force us to surrender. When that was done and it was thought we could find a defense against it, Mondale who had been trained under this attitude in our colleges and others with him, instead of using the proper name of it referred to it by the name of "Star Wars." An utter misrepresentation. And today the Russians ~~already~~ authorities are afraid of their lives that we will proceed with our investigation to find a way to make their bombs of no value against us. Their great effort today defended by so many in this country is to do away with the efforts to find a defense against it.

Now we can see what danger there is ahead. Is peace so dear or life so sweet as to be purchased at the price of chains and slavery? Will our leaders give away the only chance of defense against the great armaments Russia has developed? America is the last hope of freedom today. The American power is the last hope of preserving freedom in the world, or civil rights in the world humanly speaking. America is the greatest center at least as far as material backing is concerned for missionary work throughout the world. There is nothing Satan would like better than to see our power destroyed.

When civil rights in America were threatened by George III people from France, from Germany, from Hungary, from other countries came forward to help the colonies to win their freedom that they had had before George III came to power, and with their help America gained its freedom. Today in Nicaragua the communists have taken away all civil rights, and have deprived all organizations of any right to spread Christianity, and are forcing all their young men into training for aggressive war, today when this is happening these people who
