

Thus communication from one ~~personality~~ to another is an essential feature of the advance of scientific knowledge. A scientific attitude must constantly be maintained toward such communications. One ⁶ must know ~~exactly~~ who the communication comes from. One must know whether ^{the words of the communicator} ~~he~~ has had opportunity to know the facts presented ⁱⁿ ~~in~~ ^{his} ~~communication.~~ One must know how dependable he is. In communications ~~describ-~~ ~~ing and~~ presenting models or theories, one must also be able to interpret the words.

Some men are very brilliant in ideas but very poor in communication. ^{2 almost} Any sentence has ³ more than one possibility of interpretation. ¹ Sentences must be carefully studied, ^{for} Ideas must be intelligently examined. Anyone who constructs an extensive model of a portion of reality must very scientifically assess the great part of the ^{input} ~~input~~ ⁷⁰⁰ that comes from communications from others.
