I xwx was at a picnic at the Dunzweilers and there I met a young man whom they called "Nick." It was assumed that I xxxxxxxxx knew him. He sat and talked with me or rather led me to talk for a long time. I learned that he is in charge of the junior high school work at the Horsham Bible Church. He is employed in computer work. A few things of considerable interest about his work and about his work int in the church, about how he came to know the LOrd, about his service to the LOrd, and so on. I really ought to dictate this before too long. However, at the moment I am thinking of the firs tpart of the conversation when he began asking mad me about the mountains, travel, and related subjects. I think of this particularly now because Mr. Pakala mentioned that he wished that I want would write up my contacts with Dr. ! lbright and in particular my contacts with him in Palestine. He mentioned my trip with Dr. Albright when for three weeks we went through the back country of Palestine on horseback. There were four of us in the party, Professor Albr-ght was born in South America, Professor ************ Jirku was from Germany, Professor LI was from China, and of course I myself from North America. Thus we were born in on four different continents. There was no one language that all four of us could use. kehyexxxxxx Professor/ could nto understand spoken German, and Professor Jirku could maxx not understand spoken English. The result was that at every place we stopped Dr. Albright had to explain about it twice. Dr. Albright had then been nine years in Palestine and knew the country as no one else did. He would explain in one of xxxx the two x languages and then in the other. So I heard his explanation twice, which made it easier to remember tam than if I'd heard it only once. In addition there were always small additions in either one that had not been included in the other.
