

Bibliographical Essay

XX-14

.158 The standard account of the decipherment of the tablets . . . is that of John Chadwick, The Decipherment of Linear B (Cambridge University Press, 1958; Penguin edition, 1961). Good brief archaeological surveys will be found in two volumes of the Ancient Peoples and Places series (New York: Praeger): Carl W. Blegen, Troy and the Trojans (1963), and Lord William Taylour, The Mycenaeans (1964). On arms and armor, Anthony Snodgrass, Early Greek Armour and Weapons (Chicago: Aldine, 1964), replaces all previous works.

p. 162 On the whole, the most faithful translations are the Iliad ~~and~~ of Andrew Lang, Walter Leaf, and Ernest Myers, and the Odyssey by Land and S.H. Butcher . . .

*[The following text is extremely faint and largely illegible, appearing to be bleed-through from the reverse side of the page. It contains several lines of text, some of which are underlined, but the characters are too light to transcribe accurately.]*
