

some learn that not all

~~the trains will go. You will find in this train system schedule that some~~
trains run every day. Some run week days, some run Sundays only; some are
omitted on ~~a~~ certain days of the year so as to not run on the day before ~~the~~ *some do not run on*
holiday, others ~~cannot~~ *do* run a day ~~after~~ *on the day after* the holiday. ~~Others do not run on~~ *Law runs in summer, some only in winter*
then *de* *on the day after* *Law runs in summer, some only in winter*
particular holidays. There are ~~all sorts of~~ *many* considerations that enter in,
but it is all clearly explained in a good timetable.

~~Now if we want to understand the basic essential features of life, we~~ *must*
~~know that there must be a God who created it all. Things are too regular~~ *to be*
~~accidental. They~~ *work to*
work ~~to~~ according to a ~~too~~ definite system. We put ~~two~~ *two* chemical elements
together and we get a certain result. We do the same thing tomorrow and we
get the same result. We find that there is a regularity and we know that this
must be here because a personality has established it. Now there are many
things that are not revealed to us about this regularity. We have to study
it out and try to find the answer, to find the principles that have been
wrought into it by the maker. However, if we can get a timetable, an explana-
tion, a book which He has given, telling us certain principles about the
creation which He has made, then surely this is the very best way, the most
definite way, the most certain way of finding out that which is vital for us
to know. Now God has given us such a book. Everyone believes in a God. Some
may deny it. Some may pretend they do not, but in the bottom of their heart
they do. When it comes to a crisis in life, they admit that there is a God.
And if there is a God who created things, it would be, it is not at all un-
reasonable, but altogether reasonable to expect that he would give us a book
of explanation telling us those matters which are most important for him to
know.

Now, of course, it is a difficult matter for the infinite mind of the
creator of the universe to express the vital thought that He wants us to know
in such a way that our finite minds can grasp it. He first has to give us an
understanding of concepts. He first has to develop within us a language that
can understand the basic thoughts and we know that there are many things that
