

Pre Reformation C. H. 12/18/62 - #38-5

happened to be connected with particular affairs like Athanasias. We could probably spend a year, if we knew the facts, studying about Athanasias administration in Alexandria, because he was one of the best of the Christian leaders in all the world's history in the local situation. Athanasias was so very important in the empire - wide conflict with Arianism, that that brings him into great relief and calls our attention to that. With the other, about all I've done is report about it and I doubt if we have the material available. We have much more available on the details of Ambrose in Milan than the details of Athanasias in Alexandria.
