

only a quarter of a century, a world war broke out far greater and more destructive than the first one. The League of Nations was quietly shelved. When the war ended, the United Nations was established, and it was assumed that this instrument would soon make war a thing of the past. Yet very soon the cold war broke out, occasionally bursting into hot war, and always threatening to become a universal conflagration. Again the Bible prophecy was proved to be right.

Many Bible students wonder whether the atom bomb, the hydrogen bomb, and other instruments of destruction now becoming known to various nations, show that the terrible days predicted in the Book of Revelation are at hand. If so, disaster is ahead for those who continue to defy the principles of righteousness. But those who put their trust in God's Son, and seek to build their lives according to the patterns He sets forth in the Bible, know that ultimately they will share with Christ in the government of a renewed and cleansed world, in which peace and happiness will be universal, exactly as Bible prophecy declares.

The study of Bible prophecy is difficult, but rewarding. God has revealed many facets of His plan. How thrilling it is, to watch events as they unfold, and see the working of His mighty hand!
