

E3 Continued.

the importance of the Bible from one who ^{did} ~~is~~ not recognize~~d~~ its truth.
 However it shows ~~that~~ the fallible nature of man that Huxley would
 take _____ selfcontradictory positions. If the Bible is vital for morality,
 stability, it must be true, or else it cannot be true in these spheres. I am
 very ~~for~~ fond of the last few verses^{of} the first chapter^{of the} ~~I~~ Peter. Here

There is no ~~contra~~ conflict between the Bible and science. God is the author
 of both. He is the Creator of all things, He is the one who has revealed
 to us the contents of the Bible. He led ~~A~~ man of old along. He selected them.
 He used their minds. He used their... He caused that they should
 speak in their own vocabulary, using their minds, using their words,
 using their own style ^{and} /yet telling the fact^s that He has revealed^t to them,
 facts that they have observe d, but ~~ke~~ kept free from error by His Holy
 Spirit in such a way that there was no conflict ^{....} ~~of~~ what they wrote ~~with~~ ~~the~~ ~~would~~
 be entirely true. The great leaders in the human life in the past^{have} disappeared.
 Case after case their^{very} memory has gone. They were forgotten even that they
 had ever existed. ^{But} /Case after case the Bible alone has ^{alive} kept~~the~~ the memory of
 their greatness. All human beings are like grass/ fade away, disappear,
 but the word of God abides forever. There can be no conflict between the
 Bible and science, ^s between the fact^s of God's revelation and the facts of God's
 creation. True theology, and true science can never contradict each
 other. However, theologians ~~and--~~ and scientists may often contradict
