

There were many who were holding such ideas, but the great rank and file of people thought it was a highly & tenable idea, and did not feel that there was really much support for it.

Actually, Darwin is not the one who brought about the change. Darwin was _____, Darwin was the banner. Thomas Henry Huxley &s the force. And due it was to Thos. Henry Huxley more than any other individual that the great change came about in England which has effected the whole civilized world.

I'd like to say a few words about the lives of these two men. Darwin's grandfather wrote this poem on evolution. He was a very energetic fellow, and a very effective physician for his day. He had a son named Robert who was a physician who was able to make a lot of money, but most investigators think it was due to his psychological insights and his knowledge of a few diseases rather than to any deep medical knowledge. Robert Darwin was a complete unbeliever, but he kept it to himself. He kept it and said very little about it. His wife was an earnest believer. Robert Darwin was an effective doctor who made great sums of money, more than perhaps almost any other doctor in England at his time, but he hated medicine. But he wanted his son to make something of himself. When young Charles did not take an interest in making something of himself, and would spend his time gathering little animals and studying different kinds of plants, his father got disgusted his him and said to him, Charles, you'll never amount to anything. He said you spend all your time shooting at dogs and catching frogs and you just waste all your time. He said, You ought to go and study medicine. So Charles obediently (he was always very diffient to his father and grandfather) went to Edinburgh and spend two years
